Allianz Versicherungs-AG

Hiring Team

Application: Werkstudent Data Analyst

Dear Hiring Team,

I am applying for the Werkstudent Data Analyst position at Allianz Versicherungs-AG in Unterföhring near München, Germany. My Fast Food Nutritional Analyzer project shows the kind of dashboard work an insurer's Data Analyst function values. I built a two page Tableau dashboard with a dynamic shopping cart using Set Actions, parameter driven analytics with a user controlled goal, and complex order of operation calculated fields, all on a colour blind safe dark mode palette designed to shorten time to insight for decision makers.

On the data engineering side I have shipped a five page Looker Studio dashboard on top of a Bronze, Silver, Gold medallion architecture in BigQuery, with schema enforcement, deduplication, and normalised joins. And my Economic Impact Analysis of Global Climate Events project shows I can turn raw operational data into clear business relevant reports for non technical stakeholders, a natural fit for insurance risk and reporting work.

I can work up to 20 hours per week under my student visa, my German is at B1 and improving, and I am glad to work on site in Unterföhring or a hybrid setup. I would welcome the chance to discuss the role.

Kind regards,

Rahul Rawat
