BarmeniaGothaer

Hiring Team

Application: Werkstudent Business Intelligence SAP Data Warehouse BW/4HANA

Dear Hiring Team,

I am applying for the Werkstudent Business Intelligence position with a focus on SAP Data Warehouse BW/4HANA at BarmeniaGothaer in Köln. My Movie Analytics and ML Pipeline project sits closest to the shape of a data warehouse and BI role. I built an end to end batch pipeline pulling data from a public API into a Google Cloud data lake, processed through a Bronze, Silver, Gold medallion architecture in BigQuery on a Cloud Scheduler trigger, engineered the Silver layer with schema enforcement, safe type casting, deduplication via window functions, and normalisation into a relational model, and answered concrete business questions in a five page Looker Studio dashboard, all patterns that translate cleanly to SAP BW modelling.

My Fast Food Nutritional Analyzer project shows how I design interactive dashboards for real end users, with a two tier executive plus finder layout, dynamic parameters, and a colour blind safe palette. My Economic Impact Analysis of Global Climate Events project shows I can communicate statistical findings to non technical stakeholders.

I can work up to 20 hours per week under my student visa, my German is at B1 and improving, and I am glad to work on site in Köln or a hybrid setup. I would welcome the chance to discuss the role.

Kind regards,

Rahul Rawat
