PENNY

Hiring Team

Application: Werkstudent Data and Analytics

Dear Hiring Team,

I am applying for the Werkstudent Data and Analytics position at PENNY in Köln, Germany. My Movie Analytics and ML Pipeline project sits closest to the shape of a retail Data and Analytics function. I built an end to end batch pipeline pulling data from a public API into a Google Cloud data lake, processed it through a Bronze, Silver, Gold medallion architecture in BigQuery on a Cloud Scheduler trigger, and answered concrete business questions in a five page Looker Studio dashboard on genre ROI, foreign language growth, and release season timing, all of which have direct retail analogues.

My Fast Food Nutritional Analyzer project shows how I design dashboards that people actually use, a two tier layout with an executive macro view and a granular finder, dynamic parameters, and a colour blind safe dark mode palette. My Economic Impact Analysis of Global Climate Events project shows I can turn raw event data into structured business relevant insight for non technical stakeholders.

I can work up to 20 hours per week under my student visa, my German is at B1 and improving, and I am glad to work on site in Köln or a hybrid setup. I would welcome the chance to discuss the role.

Kind regards,

Rahul Rawat
