XiLLeR GmbH

Hiring Team

Application: Praxissemester Data Scientist KI

Dear Hiring Team,

I am applying for the Praxissemester Data Scientist KI position at XiLLeR GmbH in Home Office, Germany. The Praxissemester is a mandatory part of my Master of Science in Data Science and Analytics at SRH Heidelberg, and the description of your Data Scientist and KI role fits it precisely. I am ready to work full immersion for the semester on real production data rather than sandbox exercises.

My Hybrid RAG Orchestrator project shows I can build modern AI systems end to end, from a Llama 3.1 language model on Groq through ChromaDB retrieval and a stateful memory agent, all wrapped in a shipped Streamlit interface. My CreditIQ project shows I can build production grade machine learning under real regulatory constraints, and my Bachelor Thesis shows I can evaluate models honestly on imbalanced data with proper cross validation.

I am comfortable working remotely, my German is at B1 and improving, and I can commit fully to the Praxissemester schedule required by the study programme. I would welcome the chance to discuss the role.

Kind regards,

Rahul Rawat
