congstar GmbH

Hiring Team

Application: Werkstudent Data and Business Analytics bei fraenk

Dear Hiring Team,

I am applying for the Werkstudent Data and Business Analytics position at fraenk within congstar in Köln. My Fast Food Nutritional Analyzer project sits closest to the shape of a customer facing analytics role. I built an interactive two page Tableau dashboard with a dynamic Meal Cart simulator, Set Actions, parameter driven analytics, and calculated fields, and I designed the layout around a two tier executive plus finder pattern in a colour blind safe palette so end users reach insight quickly.

My Movie Analytics and ML Pipeline project shows how I extend that into a full data platform. I built an end to end batch pipeline pulling data from a public API into a Google Cloud data lake, processed through a Bronze, Silver, Gold medallion architecture in BigQuery on a Cloud Scheduler trigger, and answered concrete business questions on genre ROI, foreign language growth, and release season timing in a five page Looker Studio dashboard, all patterns that map cleanly to a mobile telco data function. My Economic Impact Analysis of Global Climate Events project shows I can communicate statistical findings to non technical stakeholders.

I can work up to 20 hours per week under my student visa, my German is at B1 and improving, and I am glad to work on site in Köln or a hybrid setup. I would welcome the chance to discuss the role.

Kind regards,

Rahul Rawat
