

Rahul Rawat

Data Science Master's Student | Business Analytics and Dashboards | Python + SQL + Tableau

Mannheim, Germany · 015563603340 · rahulrawat2r@gmail.com

rah-portfolio.pages.dev · github.com/rahulrawat20022002 · linkedin.com/in/rahulrawat2r

Enrolled through April 2027 · Available immediately · Student visa with work permit

PROFILE

Master's student in Data Science and Analytics at SRH Heidelberg, based in Mannheim, with hands on experience turning raw operational data into dashboards and decision support for non technical stakeholders. I built a Tableau based Fast Food Nutritional Analyzer with Set Actions and parameter driven analytics, and delivered an end to end climate economics analytics pipeline from raw CSV to a management ready report using Random Forest models and calibrated confidence statements. Comfortable across Python, SQL, Tableau and Excel for business facing reporting.

SKILLS

AI and Agents	LangGraph, RAG, LLM as Judge, Prompt Engineering, Ollama, spaCy, BM25
Data and ML	Python, SQL, PySpark, scikit learn, CatBoost, XGBoost, LightGBM, Prophet, MICE
Cloud and Orchestration	GCP, BigQuery, Cloud Run, AWS, Docker, Apache Airflow, dbt, Git
Dashboards	Tableau, Looker Studio, Streamlit, Power BI
Web	React, module federation, Playwright, HTML5, CSS3

PROFESSIONAL EXPERIENCE

eRay GmbH

Data Scientist · Heidelberg · Oct 2025 to Mar 2026

- During a **6 month** eRay GmbH and SRH Heidelberg collaboration to forecast lake water quality across **4 target** indicators chlorophyll a, turbidity, pH and dissolved oxygen, built an end to end recursive time series pipeline over a **40 feature** space with a per target lag suite lag_1h, lag_24h, lag_3d, lag_7d, lag_roll_mean_24h and lag_roll_std_24h.
- Benchmarked **6 candidates** Ridge, Gradient Boosting, LightGBM, XGBoost, CatBoost and Prophet with strict tree constraints max_depth 4 and learning_rate **0.05**, landed on CatBoost MultiQuantile at alpha **0.05**, **0.5** and **0.85**, producing asymmetric **80 percent** prediction intervals that hug the 0 floor and chop the top **15 percent** of summer ghost spikes.

Technologies: Python, CatBoost, Prophet, scikit learn, MICE

SS Engineers and Contractors

Junior Associate Software Developer · India · Aug 2023 to Aug 2024

- With SS Engineers and Contractors running internal Data Dashboards, Analytics platforms, and Employee Portals used across the company, tasked with building and maintaining the front end features that day to day teams depended on, contributed React UI components across all three internal products, which stayed in daily use by internal teams across the company throughout the year in role.

Technologies: React, module federation, Playwright, AngularJS, HTML5, CSS3

SS Engineers and Contractors

Front End Developer Intern · India · Feb 2023 to July 2023

- During a six month internship at SS Engineers and Contractors, tasked with learning the codebase and then taking on small UI work across the internal Data Dashboards and Employee Portals under senior review, paired closely with senior developers to walk the codebase and then shipped focused UI components including charts, filters, and profile pages, iterating each one on code review feedback until it landed.

Technologies: React, HTML5, CSS3, Git, code review workflow

EDUCATION

M.Sc. Data Science and Analytics

SRH University of Applied Sciences Heidelberg, GPA 1.9 · Heidelberg · Apr 2025 to Present

Bachelor of Technology in Computer Science

GL Bajaj Institute of Technology and Management, CGPA 7.3 of 10 · Greater Noida, India · 2019 to 2023

PERSONAL PROJECTS

Fast Food Nutritional Analyzer and Meal Simulator

2025

- For a Tableau dashboard project where users needed to explore fast food nutrition and simulate a meal rather than just filter charts, tasked with the interaction layer, built a dynamic shopping cart using Tableau Set Actions so end users can select scatter plot points and instantly total the 3 key macros calories, fat and protein for a simulated meal.
- With 1 static Y axis being unable to serve both a muscle gain and a weight loss goal, tasked with letting the viewer switch objective without reloading, implemented parameter driven analytics with a dynamic Y axis tied to a user controlled goal parameter using a CASE statement, which produced consistent axis switching across 2 objectives without dashboard reloads.

Technologies: Tableau with Set Actions, parameters and calculated fields, data storytelling and UI or UX

RESEARCH AND THESIS

Bachelor Thesis, Diabetes Prediction Using Machine Learning

GL Bajaj Institute of Technology and Management, IEEE style paper · Greater Noida, India · 2022 to 2023

- For a Bachelor thesis on diabetes prediction with a small clinical dataset of **768 patients**, tasked with building a defensible model comparison the examiners could audit, built a full end to end machine learning pipeline comparing six classifiers with **10 fold** cross validation and per model confusion matrices, delivering a model comparison that stood up in the thesis defence.
- Spotting biologically impossible zero values in the source data that the original authors had overlooked, tasked with restoring data integrity before any model fit, applied IQR based outlier removal and proper imputation, which lifted the dataset from silently broken to a clean training input for every downstream model.
- With a **65 to 35 class** imbalance that made accuracy a misleading headline metric, tasked with choosing an evaluation that would not hide errors on the minority class, moved the headline metric from accuracy to ROC AUC, which exposed the real error patterns the accuracy score had been masking and gave the thesis an honest performance comparison.
- With the results needing to be publishable in substance rather than just submissible, tasked with writing them up formally, produced an IEEE style paper including an honest limitations section and what to do differently in a follow up study, which the supervisor accepted as publishable in substance.

Technologies: Python, scikit learn, Pandas, Seaborn

CERTIFICATIONS

- SAS Certified Specialist: Visual Business Analytics Using SAS Viya, issued May 2025.
- Google Data Analytics: Foundations, Data, Data, Everywhere, issued April 2025 on Coursera.
- AWS Academy Graduate: AWS Academy Cloud Foundations, issued July 2025.

ACHIEVEMENTS

- USAII Global AI Hackathon 2026: Finalist at Graduate Level, awarded by the United States Artificial Intelligence Institute for innovation, technical creativity, and applied AI on real world challenges.

LANGUAGES

English: Fluent, written and spoken

German: B1, in progress
