

Rahul Rawat

Working Student, Data Science

PERSONAL DETAILS

Address: C2 16, 68159 Mannheim, Germany

Phone: 015563603340

Email: rahulrawat2r@gmail.com

LinkedIn: linkedin.com/in/rahulrawat2r

GitHub: github.com/rahulrawat20022002

Portfolio: rah-portfolio.pages.dev

Date of birth: 20 February 2002

Nationality: Indian, student visa with valid work permit

Availability: Werkstudent 20 hours per week immediately, full time from April 2027

PROFILE

Master's student in Data Science and Analytics at SRH Heidelberg, based in Mannheim, with hands on experience building machine learning pipelines, LLM tools, and decision support systems in regulated settings. I built CreditIQ, a fairness by design credit scoring system that lifted the Disparate Impact ratio from **0.79** to a compliant **0.88** and cut the false negative rate from **44 percent** to **16.7 percent**, and delivered a recursive time series pipeline for 4 water quality indicators at eRay GmbH using CatBoost MultiQuantile with **80 percent** prediction intervals. Comfortable across Python, SQL, scikit-learn, LangGraph, GCP and AWS.

SKILLS

Python, SQL, PySpark, BigQuery, Databricks, Delta Lake, Power BI, Tableau, Looker Studio, LangChain, LangGraph, Ollama, CatBoost, LightGBM, XGBoost, Prophet, MICE, scikit-learn, PyTorch, dbt, Apache Airflow, GCP, AWS, Docker, Git, React, Playwright

PROFESSIONAL EXPERIENCE

eRay GmbH

Data Scientist · Heidelberg · Oct 2025 to Mar 2026

- During a **6 month** eRay GmbH and SRH Heidelberg collaboration to forecast lake water quality across **4 target** indicators chlorophyll a, turbidity, pH and dissolved oxygen, built an end to end recursive time series pipeline over a **40 feature** space with a per target lag suite lag_1h, lag_24h, lag_3d, lag_7d, lag_roll_mean_24h and lag_roll_std_24h.
- Benchmarked **6 candidates** Ridge, Gradient Boosting, LightGBM, XGBoost, CatBoost and Prophet with strict tree constraints max_depth 4 and learning_rate **0.05**, landed on CatBoost MultiQuantile at alpha **0.05**, **0.5** and **0.85**, producing asymmetric **80 percent** prediction intervals that hug the 0 floor and chop the top **15 percent** of summer ghost spikes.
- Made the September evaluation defensible with a **3 pass** outlier system pH tightened from **0 to 14** down to **7.0 to 9.0**, Oct and Nov caps of **15.0** on chlorophyll a and **50.0** on turbidity, and a rolling z-score at $z > 2.5$ over **48 hours**, and excluded 5 sparse sensors plus 3 concurrent proxies phycocyanin_abs, phycocyanin_abs_comp and toc, surfacing the honest R squared of **0.86** on dissolved oxygen and **0.81** on pH.
- Reconstructed Oct and Nov gaps with IterativeImputer MICE, ran full Memory Buffer recalculation across all 6 lag features, generated a synthetic winter canvas with 4 degree Celsius floor and **0.4** degree diurnal amplitude, then wrapped it all in an orchestrator with gate checks, ecological clips dissolved oxygen **4.0 to 18.0** and pH **6.0 to 9.0** and a **0.003** pH per hour velocity clamp.

Technologies: Python, CatBoost, Prophet, scikit learn, MICE

SS Engineers and Contractors

Junior Associate Software Developer · India · Aug 2023 to Aug 2024

- With SS Engineers and Contractors running internal Data Dashboards, Analytics platforms, and Employee Portals used across the company, tasked with building and maintaining the front end features that day to day teams depended on, contributed React UI components across all three internal products, which stayed in daily use by internal teams across the company throughout the year in role.
- With a client relying on a legacy AngularJS app that had to sit inside an existing module federation setup alongside newer React micro frontends, tasked with porting the client's screens across without breaking the running product, ported around **8 routes** from AngularJS to React inside the module federation shell over **4 months** of incremental releases, shipped with no production incidents during rollout.

Technologies: *React, module federation, Playwright, AngularJS, HTML5, CSS3*

SS Engineers and Contractors

Front End Developer Intern · India · Feb 2023 to July 2023

- During a six month internship at SS Engineers and Contractors, tasked with learning the codebase and then taking on small UI work across the internal Data Dashboards and Employee Portals under senior review, paired closely with senior developers to walk the codebase and then shipped focused UI components including charts, filters, and profile pages, iterating each one on code review feedback until it landed.

Technologies: *React, HTML5, CSS3, Git, code review workflow*

EDUCATION

M.Sc. Data Science and Analytics

SRH University of Applied Sciences Heidelberg, GPA 1.9 · Heidelberg · Apr 2025 to Present

Bachelor of Technology in Computer Science

GL Bajaj Institute of Technology and Management, CGPA 7.3 of 10 · Greater Noida, India · 2019 to 2023

PERSONAL PROJECTS

CreditIQ: Fairness by Design Credit Scoring

2025

- For an SRH Heidelberg project on regulated credit scoring where a baseline model was failing the EU AI Act and AGG **80 percent** fairness bar, tasked with getting it back into compliance without gutting predictive quality, applied AIF360 mitigation and threshold calibration on a real credit dataset, which raised the Disparate Impact ratio from a failing **0.79** to a compliant **0.88**.
- After single axis age bias was fixed but younger women were still being penalised, tasked with finding and correcting the hidden intersectional bias, used SHAP driven subgroup analysis to expose the pattern and designed a four way age by gender threshold matrix, which corrected it without over correcting into reverse discrimination.
- With a large false negative rate silently rejecting good applicants, tasked with cutting it while keeping overall accuracy defensible, documented the fairness accuracy trade off as a deliberate and regulator defensible decision, which brought the false negative rate down from **44 percent to 16.7 percent** while accuracy held at **75 percent** on the held out test split.

Technologies: *Python, scikit learn, AIF360, SHAP, Streamlit*

RESEARCH AND THESIS

Bachelor Thesis, Diabetes Prediction Using Machine Learning

GL Bajaj Institute of Technology and Management, IEEE style paper · Greater Noida, India · 2022 to 2023

- For a Bachelor thesis on diabetes prediction with a small clinical dataset of **768 patients**, tasked with building a defensible model comparison the examiners could audit, built a full end to end machine learning pipeline comparing six classifiers with **10 fold** cross validation and per model confusion matrices, delivering a model comparison that stood up in the thesis defence.
- Spotting biologically impossible zero values in the source data that the original authors had overlooked, tasked with restoring data integrity before any model fit, applied IQR based outlier removal and proper imputation, which lifted the dataset from silently broken to a clean training input for every downstream model.
- With a **65 to 35 class** imbalance that made accuracy a misleading headline metric, tasked with choosing an evaluation that would not hide errors on the minority class, moved the headline metric from accuracy to ROC AUC, which exposed the real error patterns the accuracy score had been masking and gave the thesis an honest performance comparison.
- With the results needing to be publishable in substance rather than just submissible, tasked with writing them up formally, produced an IEEE style paper including an honest limitations section and what to do differently in a follow up study, which the supervisor accepted as publishable in substance.

Technologies: *Python, scikit learn, Pandas, Seaborn*

CERTIFICATIONS

- NVIDIA: Building LLM Applications With Prompt Engineering, issued November 2025.
- AWS Academy Graduate: AWS Academy Cloud Foundations, issued July 2025.
- Google Data Analytics: Foundations, Data, Data, Everywhere, issued April 2025 on Coursera.

ACHIEVEMENTS

- USAII Global AI Hackathon 2026: Finalist at Graduate Level, awarded by the United States Artificial Intelligence Institute for innovation, technical creativity, and applied AI on real world challenges.
